The assessment period of the Share Options under the Share Option Incentive Scheme covers four accounting years from 2021 to 2024. The assessment shall be conducted once a year.

The annual performance assessment targets of the Share Options granted are as follows:

Exercise period	Targets of performance assessment

Fourth Exercise Period	The net profit growth rate of 2024 shall be no less than 730% based on the net profit of 2020.

The “net profit” and net profit growth rate mentioned above refer to the net profit attributable to the Shareholders of the Company after deducting non-recurring profit or loss, with the net profit excluding the share-based payments incurred by the Company’s implementation of Share Option Incentive Scheme as the calculation basis.

If the Exercise Conditions of the Share Options are fulfilled, the Participants may exercise their Share Options according to the proportion as stipulated in the Share Option Incentive Scheme. If the Company fails to achieve the above performance assessment targets, none of the Participants shall exercise their Share Options exercisable for the corresponding assessment year, which shall be cancelled by the Company.

(iv) Performance assessment at segment/subsidiary level

Exercise of the Share Options is subject to the fulfillment of the performance commitment to the Company made by the segment or subsidiary to which the Participants belong. Detailed arrangements for exercise of the Share Options are shown in the following table:

Assessment results	Actual fulfillment of performance commitment	Method for exercise of Share Options
Fulfilled	P 100%	All the Share Options which are to be exercised by the Participants in the segment/subsidiary for the period can be exercised
	80% P<100%	“80% of the Share Options which are to be exercised by the Participants in the segment/subsidiary for the period” can be exercised and the remaining shall be canceled by the Company
Not fulfilled	P<80%	None of the Share Options which are to be exercised by the Participants in the segment/subsidiary for the period can be exercised and all of them shall be canceled by the Company

The Share Options which are to be exercised by the Participants in the segment/subsidiary for the period can only be exercised fully or partially when the performance commitment has been fulfilled in the assessment for the previous year; if the segment/subsidiary fails to fulfill its performance commitment, the portion out of the Share Options which have been granted to and are to be exercised by the Participants in the segment/subsidiary for the period shall be canceled by the Company according to the requirements under the Incentive Scheme.

The Share Options which are to be exercised for a period shall correspond to the performance assessment at segment/subsidiary level, and the portion of the Share Options for which the performance commitment is not fulfilled in an assessment year shall not be deferred to the following year and shall be cancelled by the Company instead.

(v) Performance assessment at individual level

The Remuneration and Assessment Committee will grade the comprehensive assessment results of the Participants for each assessment year, the details of which are as follows:

Assessment results(S)	S 80	80 > S 70	70 > S 60	S < 60
Standard quota	1.0	0.9	0.8	0

Number of Share Options a Participant actually exercises for a particular year = Number of Share Options the Participant plans to exercise for the year × exercise proportion.

The Participants can only exercise part or all of their Share Options for a particular year when they meet the conditions during the performance assessment in the previous year. Whether a Participant can exercise his/her Share Options depends on the individual performance assessment results of the Participant under the Assessment Measures of the Company. The Share Options that cannot be exercised in an assessment year shall be cancelled by the Company.

(3) *Scientificity and Reasonableness of the Assessment Indicators*

The assessment indicators of the Company's Share Option Incentive Scheme are divided into three levels, namely, the performance assessment at the company level, the performance assessment at segment/subsidiary level and the performance assessment at the individual level.

The indicators of performance assessment at the company level are the net profit growth rate, which ultimately reflect the operation condition, profitability and growth of an enterprise. The indicator of net profit is an important indicator to measure the operation performance of an enterprise, which can help an enterprise to establish a good image in the capital market. After taking into consideration the macroeconomic environment, historical performance, development condition in the industry, market competition and the development plan of the Company in the future and other related factors, the Company has established the following performance assessment targets for the Incentive Scheme: based on the net profit attributable to Shareholders of the Company after deducting non-recurring profit or loss of 2020, the net profit growth rate of 2021–2024 shall be no less than 380%, 520%, 620%, 730%, respectively. The Company has established net profit indicator which is scientific and reasonable for the Share Option Incentive Scheme, which is beneficial to motivating and mobilizing the work enthusiasm and initiative of the Participants, and therefore facilitating the achievement of the Company's strategic objectives.

In addition to the performance assessment at the company level, the Company has established a strict performance assessment system for the segment/subsidiary and individuals, which evaluates comprehensively the performance of each segment/subsidiary and the Participants in an accurate and comprehensive manner. The Company will determine whether each segment/subsidiary and the Participants meet the exercise conditions based on their performance assessment results for the previous year.

Given the above, the assessment system for the Incentive Scheme of the Company is comprehensive, systematic and operable, and the assessment indicators are scientific and reasonable, which are binding on the Participants and can serve the assessment goal of the Incentive Scheme.

In accordance with the requirements of the Accounting Standards for Enterprises No.11- Share-based Payment, the Company shall, on each balance sheet date during the Vesting Period, adjust the estimated number of Share Option that may be exercised in accordance with the latest number of the Participants who have fulfilled the exercise conditions and the performance indicators, and recognize the services received during the period as the relevant costs or expenses and capital reserve in accordance with the fair value of the Shares Option on the grant date.

(2) Calculation of the Fair Value of the Share Options

The Ministry of Finance promulgated the Accounting Standards for Business Enterprises No. 11 – Share-based Payment and the Accounting Standards for Business Enterprises No. 22 – Recognition and Measurement of Financial Instruments on 15 February 2006, which began to be applied by listed companies on 1 January 2007. According to the relevant provisions on the determination of fair value in the Accounting Standards for Business Enterprises No. 22 – Recognition and Measurement of Financial Instruments, an appropriate valuation model is required to be selected to calculate the fair value of the Share Options. The Company chooses Black-Scholes model (B-S model) to calculate the fair value of the Share Options, and then uses the model to pre-calculate the Share Options to be granted (to formally calculate at the time of grant) on the day of announcement of the draft version. The specific parameters were selected as below:

- (i) Price of the Underlying Shares: RMB96.28 per Share (assuming the closing price was RMB96.28 on the Grant Date)
- (ii) Validity Period: one, two, three and four years, respectively (based on the period commencing from Grant Date and ending on the first Exercisable Date for each respective period)
- (iii) Historical volatility ratio: 62.96%, 57.24%, 54.89% and 55.51%, respectively (adopted the historical volatility ratio of the Company in the latest one, two and three years, respectively)

- (iv) Risk-free interest rate: 2.58%, 2.78%, 2.87% and 2.93%, respectively (adopted the yield of PRC treasury bond for one, two, three and four years)
- (v) Dividend yield: 0.48%, 0.91%, 0.80% and 0.65% (the average dividend rate of the Company in one year, two years, three years and four years prior to the announcement of the Share Option Incentive Scheme)

(3) Impact on the operating performance of the Company

The fair value of the Share Options on the Grant Date which is determined in accordance with the relevant valuation method, and the costs of payment of Shares under the Share Option Incentive Scheme which is determined finally, will be amortized in accordance with the percentage of Share Options exercised during the implementation of the Share Option Incentive Scheme. The incentive costs incurred from the Share Option Incentive Scheme will be charged to the recurring profit and loss.

Assuming that the Company grants Share Options to the Participants at the beginning of June 2021, according to the requirements of the PRC accounting standards, the impact of the Share Options granted under the Share Option Incentive Scheme on accounting costs of each period is shown in the following table:
